## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1653

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

I. Claims 1-10 and 17-26 are drawn to an isolated polynucleotide, classified in class 536, subclass 23.1.

II. Claims 11-16 are drawn to a substantially pure protein, classified in class 530, subclass 350.

III. Claim 28 is drawn to a sunscreen formulation, classified in class 435, subclass 7.1.

IV. Claims 29-31 are drawn to a filter, classified in class 424, subclass 9.6+.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons. The special technical feature of Group I is an isolated polynucleotide, host cell, and vector, the special technical feature of Group II is a pure protein, the special technical feature of Group III is a sunscreen formulation and the special technical feature of Group IV is a filter to screen UV light. The products of Groups I and II lack a corresponding special technical feature because the products have different structures, function and modes of

Art Unit: 1653

operation. For example, the protein can be used to make antibodies and although the DNA can encode the protein, the protein can be made by other means such as synthetic processing. In addition, the DNA can be used not just to produce the protein but as probes or in a hybridization assay. The inventions of Groups III and IV are distinct because the formulation is to generate a sunscreen and the filter is to screen UV or other wavelengths of incident light, different end results. Thus, these inventions are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
